## INTERNATIONAL WORKSHOP AGREEMENT

## IWA 42

First edition  
2022-11

### 3.1.1

#### **net zero**

net zero GHG

condition in which human-caused *residual GHG emissions* (3.2.9) are balanced by human-led *removals* (3.3.3) over a specified period and within specified boundaries

#### **Net zero guidelines**

This document provides guidance on what governance organizations and other organizations can do to effectively contribute to global efforts to limit warming to 1,5 °C by achieving net zero no later than 2050. It provides guidance on a common and equitable contribution and recognizes the capability of individual organizations in contributing to achieving global net zero. This document, when used in combination with applicable science-based pathways, provides guidance for organizations seeking to set robust climate strategies.
